

The foodMAX family

Lift your product handling to the MAX.

Smart oriented handling,
driven by your industry.

loadMAX

inspectMAX

packMAX

The foodMAX family

Applications

- Processing of randomly oriented and irregularly formed products (food and non-food)
- Support or replacement of manual handling
- (Qualitative) sorting or combinations based on weight, form, colour, etc.
- Reduction of "give away" weight

Per unit

- Transport system handles crates, trays or boxes
- Flexibility through changeable product grippers

Per system

- 2D-3D image processing
- Modular design and flexible layout
- Can be integrated with existing production equipment
- Simultaneous processing of different products

Optional

- Weighing, track & trace, product processing, flexible product buffer, customized expansion
- Cleaning-in-place for food and other hygienically sensitive products

Our foodMAX products

loadMAX

The best way to handle your product from the supply line to your desired packaging or next process step.

inspectMAX

The best way to qualify your products, from color to shape, from weight to any foreign contaminants.

packMAX

The best way to supply any form of packaging to the loadMAX: box, tray, cups.

Smart handling,
driven by **your**
industry

Quality • Flexibility • Productivity • Hygiene • Shelf-life

Manual labour • Give-away weight • Labour costs
